

MINERAL MATERIALS - POLYGONS GIS DATA STANDARD

BLM New Mexico
March 2002

Standard coverage name:

<area>_minma_p [<area> = the multi-character (max. 5) abbreviation for the office/area]

Valid feature types:

Polygons

Data description:

This coverage will contain polygon data for mineral materials sites in the state of New Mexico.

GPS data dictionary: (Trim ble products only)

A standard GPS data dictionary will be developed and adopted once the standard is approved.

Related documents/forms:

A Federal Geographic Data Committee (FGDC)-compliant (FGDC-STD-001-1998) digital geospatial metadata file is required for this dataset.

Polygon features:

The following Item Definitions table contains the valid items in the polygon attribute table (.pat) in addition to the default .pat items.

Item definitions:

To accommodate certain text length limitations in ArcView and GPS data dictionaries the following limits apply: item names are ≤ 10 characters; menu elements in an item description are ≤ 20 characters.

ITEM NAME	INPUT WIDTH	OUTPUT WIDTH	ITEM TYPE	ITEM DESCRIPTION
Site_name	20	20	C	The site location expressed by township/range/section/lot; eg. 23s14e12a, or 2324s1415e1213ab.
Site_type	20	20	C	The type of site. Community Pit Common_Use Negotiated Free-Use Trespass Exploration
Site_com	20	20	C	The type of commodity. <i>See MINERAL MATERIALS COMMODITY LIST.</i>
Mat_qual	15	15	C	The quality of the material. Excellent Good Fair Poor Unknown
Site_stat	20	20	C	The status of the site. Open Closed Not Reclaimed Closed Reclaimed Inactive Other - see comments
Stockpile	3	3	C	The indication of whether the site is a stockpile. Yes No
Comments	52	52	C	Any additional information relevant to the site.
Acres	9	9	N 1	The calculated acreage of the site.
Col_method	30	30	C	The method used to collect the site data, eg. GPS - corrected, Digitized from DOQQ 1994, etc.
Gps_date	10	10	C	The auto-generated date of GPS-collected data.
